Wecoline BubbleFlush

Toilet cleaning
without chemicals

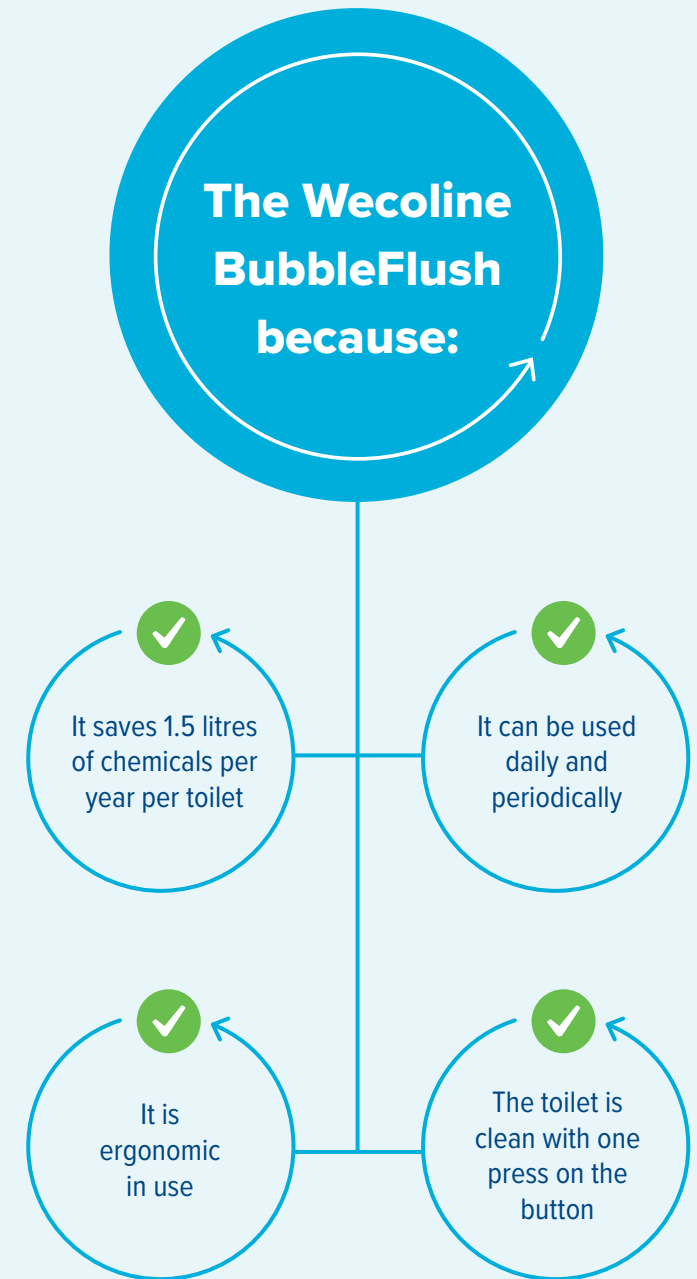

The Wecoline BubbleFlush is the world's first active toilet cleaning system that cleans toilets without using environmentally harmful cleaning agents.

The patented product uses ultrasonic vibrations.

These vibrations create small powerful air bubbles

in the water that eventually implode with force

to remove lime and attached dirt in a flash.

The Wecoline BubbleFlush consists of:

- **Handle + battery**
(part 1)
- **Cleaning head**
(part 2)

Procedure:

Green, flashing:

BubbleFlush is ready for use

One short press:

Blue flashing BubbleFlush works for 30 seconds

One long press:

(> 2 seconds) Blue continuous BubbleFlush works for 60 seconds

Press once with blue light:

BubbleFlush is switched off

Red, flashing:

BubbleFlush needs charging

Save 1.5 litres of chemicals per toilet? Then clean with the Wecoline BubbleFlush.

The Wecoline BubbleFlush is kept in the toilet bowl where no physical force is required from the cleaning employee. During cleaning, you are no longer exposed to cleaning agents.

Using the Wecoline BubbleFlush reduces the use of plastic, waste, transport and water. Other results are cleaner wastewater and improved waste management.

Eliminates 1.5 litres of chemicals per year per toilet bowl

100% recyclable after service life
