

iClean[®] Dashboard

Cleaning Meets the Internet of Things

Simple, intuitive, and integrated, the Tersano **iClean[®] Dashboard** is the first of its kind to provide cleaning data at-a-glance. This revolutionary display can track SAO[®] usage, manage inventory and organise information. Quickly identify trends and measure efficiencies to make informed decisions to improve time management. With data that tells a story, the iClean Dashboard quantifies your sustainability initiatives by reporting the volume of toxic chemicals you've kept out of the environment.

DEVICE COMPATIBILITY

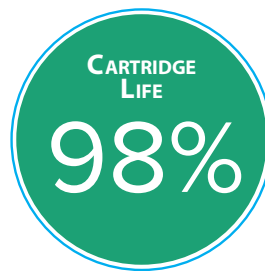

FEATURES

Your Data, Seamlessly Delivered

Usage Tracking

Toggle between daily, weekly, and monthly litre usage, and name your dispensers to identify their on-site location.

Inventory Management

Manage your inventory with cartridge life tracking; simple color codes tell you when it's time for a replacement.

Sustainability Reporting

The dashboard reports how many liters of toxic chemicals you've kept out of the environment to meet your goals.
