

## **REVOLUTIONARY** foaming hand wash – the sustainable solution with water- soluble sachets and 100% bio-degradable packaging.

Introducing Sakura Blossom Hand Soap Sachets — its water-soluble packaging dissolves with use, offering an eco-friendly, compact refill solution. Unlike traditional liquid refills contained in plastic, our biodegradable packs save space, reduce transport and storage space.

- ✓ Reduction in Transport & Storage Space
- ✓ Pre-dosed Formulas for Simple Use & Handling
- ✓ 95% Reduction in Carbon Emissions
- ✓ 90% Reduction in Plastic Waste & Packaging
- ✓ 100% Biodegradable
- ✓ 100% Vegan Products

## We are **PROUD TO BE DIFFERENT** To Other Foaming Hand Soaps

Our product uses technology to encapsulate the soap powder in water soluble film, which once added to water completely dissolves to form a foaming soap! Plus our innovative soap solution is 100% biodegradable meaning zero waste.

## How Does Our Product **REDUCE** Costs and Carbon Foot Print?

Each small dissolvable sachet creates 500ml of hand wash, meaning the whole pack creates a total of 10L – lightening the load in transportation, reducing the space needed for storage, and minimising manual handling risks.

## A Little Goes A LONG, LONG Way

### Step 1

Drop 1 Sachet PER 500ml into a mixing container

### Step 2

Add required amount of warm water and shake to mix.

### Step 3

Leave for 15 minutes to dissolve...and you're done!

## How our foaming hand sachets benefit **PEOPLE, PLANET & BUSINESS.**

### Take the hassle out of refilling

Pre-dosed sachets eliminate direct contact with detergents, reduce manual handling risks, and minimise the chances of accidental spills.

### Save on logistics & transportation

Reduce transport costs and logistics with a lighter product, reduced packaging and compact solution.

### Eliminate waste and go eco-friendly

Our 100% biodegradable packaging and water-soluble sachets ensures you contribute to a cleaner environment without cluttering your bins or harming the planet.

### Reduce space needed to store

With a compact size, our product requires less storage space in warehouses and cleaning carts compared to traditional liquid refills.

### Cost Effective Solution

Cut costs and save by choosing sachets as an alternative to foaming soap cartridges and liquid soap pouches.
